

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

The Twenty-Fifth Volume of the Lineage Book contains one thousand records from Number 24001 to 25000.

The perusal of these records has been fraught with deep interest, and brings the reader in close touch with the past in recording the names of nineteen "Real Daughters" (daughters of soldiers of the American Revolution).

These will soon pass on to join that innumerable army. Our Society has had the glorious privilege of assisting these women, so closely allied to the heroes of that age of Liberty, not only by their respect and sympathy, but have given material aid to those of them who needed it. Thus doing them reverence and honor to the Society.

The records show that many brave women participated in the struggle by their heroic deeds, generous offerings and noble self-sacrifice.

Yet some of the records are full of pathos in their touching examples of the young boys who offered their lives for the Cause. In one, a boy of the tender age of ten years, enlisted to drive a wagon, whilst many of the youths were only sixteen years of age. Several mentioned are the sons of officers, who enlisted to wait on their fathers.

Our Lineage Books will give to the world the true unwritten history of sixty-one thousand descendants up to the present time, stretching out its pen into the future generations, revealing the past in its careful research, as no historian has ever accomplished; by the perfecting of individual records of descendants of the American heroes, and heroines. A history which is growing with the increasing years and numbers of the Organization, making a valuable acquisition to the libraries of the country.

It was well said by our Historian General in her Third Volume, "The founders of this Government have builded their own monuments" and "we," the Daughters of the American Revolution, "can only inscribe upon them our gratitude and reverence."

"See No."—indicates a reference to that number in the same volume.

"Also No." indicates the National number of a "Daughter" who has entered the Society on the same ancestor and whose lineage has been published in a former volume. This is done to link together widely scattered families. If the number should be 4006, it will be in the fifth volume; if 5005, in the sixth volume, etc.

"Real Daughters" are those whose fathers rendered service in the cause of Independence, and their names are printed in italics in the text and index. There are nineteen "Real Daughters" in this volume.
